1. Per our telecon of 10 January, the ODP combined Project Office (CSPO) plans to move from Ames building to [REDACTED] leased space in the [REDACTED] corridor in early April 1983. This requirement has been coordinated verbally with the DDA and the Director of Logistics. [REDACTED] and CSPO managers have tentatively identified a building and would like to begin detailed discussions of requirements. To get the ball rolling, could you or a member of your staff be made available to tour the new office space in the near future?

2. So far, we know that we would like a vault to be constructed to store SCI material, house 4 to 6 terminals and a small crypto facility for the terminals. The contingent will comprise [REDACTED] Depending upon security requirements, secure phones are desirable, and we would like to store a limited amount of classified material (not SCI) dispersed in the safes in the new office space.

3. Your assistance will be very much appreciated.
